

Why Fiori Learning Management Solution

Feeding on the Learning Catalog data prepared by the Human Resources, we enable the employees of the institution to attend the learnings and follow the learning plans through Fiori.

General Specialities of The Solution

The Human Resources department is able to create the questions for Employee's Learning assessment and the assessment of employees in this Fiori solution. Besides, employees' exam and assessment results can be collected and reported easily.

It is also possible for employees to check the competencies they will gain based on the Learning they have received through the Fiori Portal.

Based on the competencies that the employee is expected to have due to the position he or she is in, the system can automatically suggest learning programme to the employee through the learning catalog in the system.

Employees can instantly view the learning content they have attended, the results they have achieved and their evaluations.

Registered learnings are also added to the employee calendar. Employees can make a Learning Request to be added to the Learning Catalogue, if they wish.
