Why Personnel Master Data Transfer and Control Applications Solution

All info types of SAP HCM can be edited and deleted. Transfer templates can be simply retrieved from the system. You can also check and detect existing errors here.

Data Control

- ✓ Analysis of all types of information
- ✓ Detection of personnel missing the required field
- ✓ Detection of incorrect dates
- ✓ Early detection of payroll errors
- ✓ Detection of non-standard records (Exception detection)

Personnel Clonning Between The Systems

Our service, which is suitable for trials in the QA system, transfers live test scenarios to DEV and QA systems. It copies your working personnels in your business with all their data from the past. Cloned datas are kept available for the human resources team.

Rapidsol Master Data Transfer and Control Applications Solution

We enable you to analyze the possible errors that you may encounter in the infotypes and payrolls of the personnel, in a way that will not cause a problem early.

Cloning is not copying the system, it provides an integrated process experience that can be used by the human resources team.
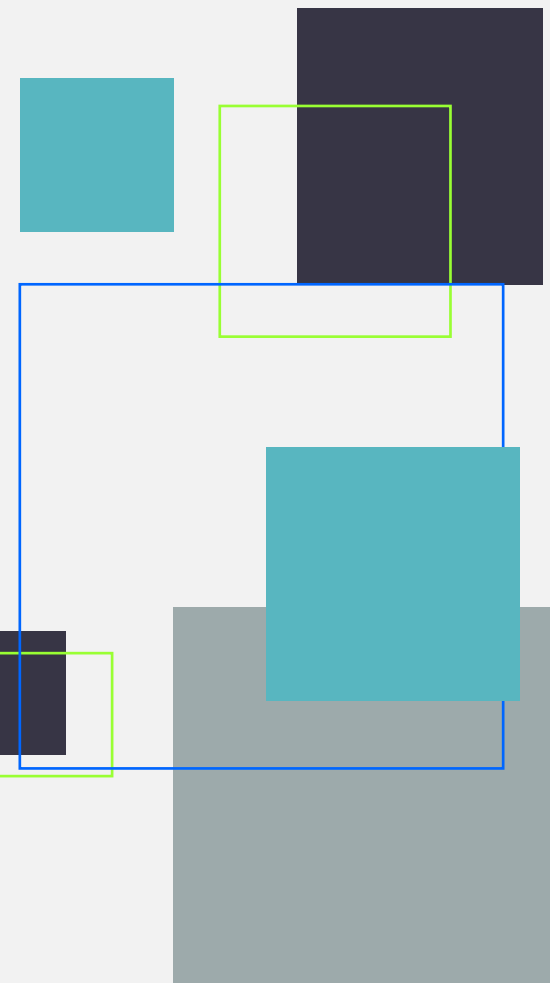

Main Data Transfer and Control Applications
