**Why** The Overtime Reason Comparison Application Solution

This Fiori application was developed for businesses that run their Time Management processes on the SAP HCM system and need to report the overtime of the personnel and the reasons for overtime.

General **Specialities** of The Solution

The Overtime Reason Comparison application reads the time management responsible group data entered in the 0001-Organizational Appointment information type of the personnel. It automatically displays the personnel connected to the user on the selected date when the application is logged. It is possible to choose more than one team.

**Detailed** Access

For detailed information and to benefit from our service, you can contact us via the contact link.

**Rapidsol** The Overtime Reason Comparison Application Fiori Solution

With this application; By breaking down on the basis of team or overtime reasons, the total number of overtime hours and reasons for overtime can be reported in the selected date range. In this way, data such as the most common reason why the personnel worked overtime on the specified date can be easily accessed. Overtime hours totals are drawn from the payroll results of the personnel, and the reasons for overtime are drawn from the information type specially adapted for the customer in the SAP HCM system.

**Gerçekleştirme**
HCM modülünde çözümün çalışması için gerekli alt yapının varlığı kontrol edilir. Çözüm kapsamında olan uyarlamalar gerçekleştirilir.

## Prerequisites

There are no prerequisites required for applications to be deployed. It is necessary to be a Fiori user only for Fiori reporting.

## Control Cockpit

With this application; By breaking down on the basis of team or overtime reasons, the total number of overtime hours and reasons for overtime can be reported in the selected date range. In this way, data such as the most common reason why the personnel worked overtime on the specified date can be easily accessed.

## Reportings

The resulting report is reflected on the screen in the form of a table and a pie chart. It is possible to customize the graph by determining the number of overtime reasons to be displayed on the graph with filters. For example, all reasons for overtime, up to 5 or up to 3, can be displayed on the chart.
