## Setup and Carrying to Live

For the implementation of the solution package, which has been worked on and is being used in many enterprises, a project management plan is created by our project management office, in which we can implement the fastest and healthiest application

## Prerequisites

There are no prerequisites required for applications to be deployed. It is necessary to be a Fiori user only for Fiori reporting.

## Control Cockpit

The application works in such a way that it does not allow the execution of changes for before or after a certain date. With this application, card transactions can be easily added/deleted/changed for a personnel with missing entry/exit transactions or who have more than one card transaction.

## Reportings

In Addition, changes or deletions of time events can be listed on the Time Event Editing screen.
